

2026 Peanut/Field Corn/Soybean Weed Control Recommendations

Eric P. Prostko – Professor/Extension Weed Specialist

Dept. Crop & Soil Sciences

Five Important General Weed Management Tips to Consider for All Crops:

- 1) Start clean using a combination of tillage (deep-turning), cover crops, and/or herbicides.
- 2) Use narrow rows (< 30") or twin rows when practical.
- 3) Use multiple residual herbicides in the system.
- 4) Make timely postemergence applications (tallest weeds ≤ 3" tall, not the average).
- 5) Hand-remove weed escapes before seed is produced.

Table 1. Herbicide Programs for Peanut.

System	Tillage Method	Timing					
		Preplant Burndown ¹	Preplant Incorporated	Preemergence	Early-Postemergence ("cracking") (~10-20 DAP ²)	Postemergence (~30-45 DAP)	Late-Postemergence ⁶ (~60 DAP) (for the extended residual control of Palmer amaranth, Benghal dayflower, and annual grasses)
non-irrigated (dryland)	strip-till ³	Glyphosate or Paraquat + 2,4-D amine + Valor (2 oz/A)		No rain expected in 7-10 DAP Paraquat + Prowl + Valor (2 oz/A)	Paraquat + either Storm or Basagran + either Anthem Flex or Dual Magnum or Enversa or Outlook or Warrant or Zidua ⁶	ALS Resistance: Cobra or Ultra Blazer + (either Anthem Flex or Dual Magnum or Enversa or Outlook or Warrant or Zidua ⁶) + 2,4-DB	Dual Magnum or Outlook <u>PHI (days)</u> Dual Magnum = 90 Outlook = 80 <u>Max Total Rate/A/Season (oz)</u> Dual Magnum = 44 Outlook = 21 *Use of other Group 15 herbicides is limited by peanut stage of growth and should not be applied late-postemergence: Anthem Flex = R3 (beginning pod) Enversa/Warrant = R1 (beginning bloom) Zidua = R3 (beginning pod)
				Rain expected in 7-10 DAP Paraquat + Prowl + Valor (2 oz/A) + Strongarm ⁴ or Paraquat + Brake + Strongarm ⁴ or Paraquat + Valor (2 oz/A) + Brake ⁵			
	conventional		Prowl or Sonalan + Strongarm ⁴	No rain expected in 7-10 DAP Valor	Paraquat + either Storm or Basagran + either Anthem Flex or Dual Magnum or Enversa or Outlook or Warrant or Zidua ⁶	Cadre ⁴ + (either Anthem Flex or Dual Magnum or Enversa or Outlook or Warrant or Zidua ⁶) + 2,4-DB	
				Rain expected in 7-10 DAP Either Valor or Brake ⁵ or Valor + Brake ⁵			
irrigated	strip-till ³	Glyphosate or Paraquat + 2,4-D amine + Valor (2 oz/A)		Paraquat + Prowl + Valor (2 oz/A) + Strongarm ⁴ or Paraquat + Brake ⁵ + Strongarm ⁴ or Paraquat + Valor (2 oz/A) + Brake ⁵		**A 4-way tank-mixture can be used if required (Cadre + Cobra or Ultra Blazer + 2,4-DB + either Dual Magnum or Enversa or Outlook or Warrant or Zidua⁶)	
	conventional			Prowl or Sonalan + either Valor + Strongarm ⁴ or Brake ⁵ + Strongarm ⁴ or Valor + Brake ⁵			

¹Apply at least 7 days before planting. ²DAP = days after planting. ³Annual grass control in strip-tillage systems is often more difficult thus additional applications of a postemergence grass herbicide (i.e. Fusilade, Poast, and Select) will be needed. ⁴Before using Cadre and/or Strongarm, rotational crop restrictions must be considered. ⁵Do not apply Brake to the same field more than 2 years in a row. ⁶Dual Magnum/Enversa/Warrant/Outlook are in the same herbicide family (chloroacetamide) and have the same mode of action (inhibit very long chain fatty acids). Zidua/Anthem Flex are not in the same herbicide family (isoxazoline) but have the same mode of action. Multiple applications (> 2) of these herbicides in a single year should be avoided when possible to prevent or delay the evolution of resistance. These residual herbicides have no postemergence activity.

Table 2. Herbicide Programs for Field Corn.

Corn Hybrid/System	Preemergence	Early-Postemergence ¹ (~17-30 DAP, V3-V5, ~279-411 GDD's ²)	Layby/ Directed/Hooded
Conventional	Atrazine ³ or Dual II Magnum or Warrant or Outlook	1) Prowl + Atrazine + Crop Oil or 2) Prowl + Atrazine + one of the following: Accent Q; Callisto; Capreno; Armezon/Impact/Impact Z; Laudis; Revulin Q; Shieldex; Steadfast Q	Evik or Paraquat
Liberty Link®	Atrazine ³ or Dual II Magnum or Warrant or Outlook	1)Liberty or Liberty Ultra + Atrazine + one of the following: Acuron (48 oz/A); Anthem Maxx; Enversa, Dual Magnum; Outlook; Prowl; Warrant; Zidua or 2)Sinate + Atrazine	
Roundup Ready®	Atrazine ³ or Dual II Magnum or Warrant or Outlook	1) Glyphosate + Atrazine + one of the following: Anthem Maxx; Dual Magnum; Outlook; Prowl; Zidua or 2) Glyphosate + Atrazine + one of the following: Callisto; Capreno; Armezon/Impact/Impact Z; Laudis; Revulin Q; Shieldex; Steadfast Q or 3) Glyphosate + Status or 4) Acuron GT or Halex GT + Atrazine or 5) Glyphosate + Acuron (48 oz/A)	
Enlist®	Atrazine ³ or Dual II Magnum, or Outlook or Warrant	1)Liberty or Liberty Ultra + Enlist One + 1 residual grass herbicide (Anthem Maxx or Enversa or Dual Magnum or Outlook or Prowl or Warrant or Zidua) or 2)Liberty or Liberty Ultra + Enlist One + Atrazine	

¹When using Counter (INFR) for soil insect and nematode control, the following herbicides should **NOT** be applied POST: Accent Q, Acuron GT, Acuron, Callisto, Capreno, Halex GT, Revulin Q, and Steadfast Q. ²GDD's = growing degree-days from planting (50°/86° F). ³A maximum of 2.0 to 2.5 lb ai/A of atrazine can be applied in a single year depending upon application methods.

Table 3. Herbicide Programs for Soybean.

Soybean System	Preemergence ¹	Postemergence (~20-30 DAP)
Roundup Ready® (glyphosate)	One of the following: Authority MTZ; Canopy/Cloak; TriCor/Metribuzin or	glyphosate + Reflex; or glyphosate + (Prefix or Warrant Ultra); or Flexstar GT
	One of the following: Boundary; Prowl; Anthem Maxx; Dual Magnum; Warrant; Zidua; Outlook; Tendovo; Treflan (PPI) or	glyphosate + Reflex; or Flexstar GT
	One of the following: Authority XL; Envive; Fierce; Fierce MTZ; Surveil; Trivence; Valor	glyphosate + (Dual Magnum or Warrant or Zidua or Anthem Maxx); or Sequence
Liberty Link® (glufosinate)	One of the following: a) Boundary or Tendovo or b) TriCor/Metribuzin + either Anthem Maxx, Dual Magnum, Outlook, Prowl, Warrant, or Zidua	a) Liberty or Liberty Ultra + Reflex or b) Zalo
	a) Prowl + One of the following: Authority MTZ; Envive; Surveil; TriCor/Metribuzin; Trivence; Valor or b) Fierce or Fierce MTZ	a) Liberty or Liberty Ultra + (Dual Magnum or Warrant or Zidua) or b) Zalo
XtendFlex® (glyphosate, glufosinate, dicamba)	a) Prowl + One of the following: Authority MTZ; Canopy/Cloak; Envive; Surveil; Tricor/Metribuzin; Trivence; Valor or b) Boundary or Tendovo or c) Fierce or Fierce MTZ	a) Liberty or Liberty Ultra + Reflex or Dual Magnum or Warrant or Zidua (Avoid Reflex if Valor product was used PRE) or b) Zalo
Enlist® (2,4-D choline, glyphosate, glufosinate)	a) Prowl + One of the following: Authority MTZ; Canopy/Cloak; Envive; Surveil; Tricor/Metribuzin; Trivence; Valor or b) Boundary or Tendovo or c) Fierce or Fierce MTZ	a) Enlist One + Liberty or Liberty Ultra + (Dual Magnum or Warrant or Anthem Maxx or Zidua) or b) Enlist Duo + (Anthem Maxx or Warrant or Zidua) or c) Zalo
Conventional	a) Anthem Maxx or Dual Magnum or Outlook or Prowl or Warrant or Zidua + One of the following: Authority MTZ; Canopy/Cloak; TriCor/Metribuzin or b) Boundary or Tendovo	Reflex; or Prefix; or Warrant Ultra (tank-mix with Classic or FirstRate if annual MG and/or sicklepod are problems)

¹Before using any metribuzin product in soybeans (Authority MTZ, Boundary, Canopy/Cloak, Fierce MTZ, Tendovo, TriCor, Trivence), check variety tolerance, soil pH, organic matter, and soil texture. Authority (sulfentrazone) products have an 18-month cotton rotation restriction. Tables updated: December 17, 2025 (replaces all previous versions).
